## Our Core Capabilities:

Elite Technical meets the accelerated demand from both government and private sectors for contract personnel specialized in aerospace and engineering with experienced engineers, designers and information technology professionals. Elite Technical Sales Engineers and recruiters have extensive knowledge of the regulations, standards, technologies and economics that influence the aerospace and defense industries. This knowledge enables them to send custom-matched temporary professionals who integrate seamlessly into our clients operations.

## Strategic Support:

Harness our experience in talent acquisition. Introduce our strategies into your organization and you will dramatically increase your candidate quality; shorten hiring lifecycles and lower costs per hire. Our strategic support offerings include:

- Requisition lifecycle management processes
- Recruitment process consulting
- B2B Gateway for proposal/capture support
- Vendor optimization/integration
- Robust MSP Solutions
